EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Anthony A. Hartmann, Reg. No. 43,662, on September 8th, 2004.

The application has been amended as follows:

IN THE CLAIMS:

Cancel claims 30-39 in their entirety.

Allowable Subject Matter

Claims 40-58 are allowed.

The following is an examiner's statement of reasons for allowance: the prior art of record neither teaches nor reasonably suggests an optical cable having a strand-like central element, at least one optical fiber, a layer of polymer material substantially devoid of discontinuities and that incorporates the central element and optical fiber, where the fiber is arranged along an open-helix trajectory and the PMD in the fiber is less than 110% of the PMD of an uncabled fiber of the same type as required by the combination claimed in claim 40.

Art Unit: 2882

The best prior art of record, Bergano (US 5,440,659), discloses a closed helix trajectory for specific purposes, and therefore does not allow for an open helix trajectory. Norman (US 6,035,086) teaches an open helix trajectory, but is silent as to how the PMD in the cabled fiber compares to the non-cabled fiber of the same type.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
